AVS Wizard

Stop wasting time and money Avs Wizard is for webmasters that need to build avs sites, and need the job done quick. Not only will the program build all the gallery pages, folders, avs entrances and free site entrance, but will also duplicate the free site entrance, add in recip tags make the thumbnails, rename pictures and a whole lot more.

Avs Wizard is your one stop avs AND free site tool, create avs sites for ALL avs systems. Check out the download page for more information and a look at the best avs tool around!

Features

- Builds complete Avs Sites
- Makes thumbnails, image pages, ect
- Can be used with all avs systems
- Use templates to fully customize!
- Build in ad control to insert ads for you
- Cut and paste window for easy submit

Free Site Wizard

Do you do alot of submitting to free sites? Free Site Wizard is the tool you need, you can quickly duplicate you're entrance many times so you can submit to more links lists, you can then get the program to semi-auto submit for you, whats that mean? It means it will fill out the form for you, all you need to do is select the category and hit the submit button.

Not only that but the program packs some smart features, such as it wont add the recip of a link list if you are using less images then it requires or if you have exceeded there allowed number of free sites a day. This program will save you tons of time and be sure you help you with you're free site empire.

Free Site Wizard can be used with any free site, you can add and remove any link list - easy yet powerful.

Features

- Duplicates entrances with recipis
- Semi auto submit!
- Loaded with over 85 link lists
- Use with any link list
- No risk of getting banned!
- If you're gallery only has 12 pictures, it will only add recipis of link lists that accept that. This will save you time!
- Post 2 sites a day? The program will know what link lists not to submit to again!
- 5 submit windows for max speed!
- Website search - is your website listed on that page?
- More rules for link lists, content types, hosting types, popups allowed?
- Manage the form fields and create custom fields for certain sites.

Gallery Wizard

Gallery Wizard is a simple easy to use but VERY powerful TGP submission program. The program will quickly duplicate you're TGP gallery and include all the recipis for the TGP's, that it's self will save you tons of work. It then uses's a 'point and paste' method for quickly submit to all the TGP sites, and whats more it comes with 50 of the BIGGEST sites pre-loaded. These are the sites that get the big hits.

Why submit to sites that only get 5 hits a day, don't be fooled with the programs that submit to 1400 tgps. 90% of them don't get more then 1,000 hits a day!!! The program stores the clean gallery in a database, so next time someone asks for clean gallerys you can export your list!

Submit more then 1 gallery a day? No problem, the program will know what tgps not to add the recip link of, we don't want you getting black listed!

Features

- Duplicates tgp galleries with recipis
- Automatically makes db of clean pages
- Loaded with 50 of the biggest tgps!
- Use with any tgp!
- No risk of getting banned!
- Custom point and paste method!
- If you're gallery only has 12 pictures, it will only add recipis of tgps that accept that. This will save you time!
- Post 2 galleries a day? The program will know what tgps not to subit to again!
- 3 submit windows for max speed!

GalleryBlaster

GalleryBlaster is a tool for mass producing TGP galleries. You select folders of content and the program will build as many galleries as possible from the images inside that folder. You can select to only use images of the same shape (vertical or horizontal or all). GalleryBlaster also has a great built-in advertising system which works on a least used bases where - the ads that have been used the least get used first - it supports all types of ads from banners, text links and html table ads and much more.

You can select two different image sizes so you can have 14 small thumbnails and 1 large thumbnail, or 10 small and 4 large the choices are limitless.

You can keep a database of keywords for each niche, and tell the software to insert 4, 5, 6 or 10 keywords for each page. These are picked randomly from the database and can even be included in the alt tags of the images!

Why leave those images sitting there doing nothing, build galleries and get them on the internet easily and quickly.

Features

- Build tons of galleries FAST!
- Use templates for full control on layout
- Have two different thumbnail sizes
- Thumbnail create, image resize / rename
- Full advertising control of all kinds of ads
- Choose the shape of the images to use - vertical, horizontal or all the images for gallery creation
- Random keyword insertion into page header and image alt tags.
- Ability to use image pages for more ad space which = more revenue.
