What is Chameleon Partner Account Requester?

Chameleon Partner Account Requester is a fast, professional and efficient tool for every adult webmaster!

With Chameleon Partner Account Requester you can easily request more than 700 partner accounts in a matter of minutes! Chameleon Partner Account Requester will save you weeks spent looking for the best TGP/MGP sites and sites which require partner accounts to allow submitting.

Our team of professional adult webmasters searches for and adds TGP/MGP sites where you can only submit with a partner account. A large number of these sites are included in the database which is part of the Chameleon Partner Account Requester!

If you are ready for enormous adult traffic, read on!

What does Chameleon Partner Account Requester offer?

Just as Chameleon Submitter, Chameleon Partner Account Requester also features easy navigation and the request process follows a step-by-step procedure. Here we present a selection of what you can find in Chameleon Partner Account Requester. If you would like to see how some features work in real time, take a look at TUTORIALS!

What is Chameleon Confirmer?

Chameleon Confirmer is an indispensable tool for webmasters who use Chameleon Submitter and Chameleon Partner Account Requester.

The Confirmer was developed by our team to increase your efficiency and comfort at work.

Chameleon Confirmer is a simple and fast e-mail confirmer developed by experienced adult webmasters. As its name reveals, it confirms links arriving to your e-mail box in large amounts after submitting. This is where the indispensable Chameleon Confirmer comes into play. It is capable of confirming 300 e-mails in a matter of seconds, saving your valuable time and increasing your efficiency at work. It has its own on-line database of scripts which ensure correct confirmation. The script database is updated by our team who regularly verify and update the scripts. Setting up of POP3 and the proxy has never been easier, to mention just one of the many advantages.

Features

- simple usage and setup
- automatic and manual confirmation
- automatically confirms emails that require the input of a confirmation code
- summary report status of confirmed e-mails
- POP3 and proxy server settings
- on-line script database
- smart and quick confirmation of links
- supports simultaneous submission of 10 e-mails
